3. Reading responses
4. Project proposal and final paper
5. Formatting and style guidelines
6. Email policy
7. Course program

COURSE DESCRIPTION AND LEARNING GOALS

This is an introduction to sociolinguistics. We will be exploring the relationship between language and social parameters as social status, ethnicity, race, gender, etc., including the role of language differences in the creation of social stereotypes. We will be emphasizing how to gather, examine, and report data.

By the end of the course, you should feel comfortable:

- Talking and writing about language variation and its social determinants
- Collecting sociolinguistic data in real-world settings using multiple methods
- Analyzing numeric data using basic quantitative and statistical tools
- Formulating and testing hypotheses about sociolinguistic topics

EXPECTATIONS AND GRADE BREAKDOWN

</tr>
<tr>
<td>Homework assignments (x 5)</td>
<td>10%</td>
</tr>
<tr>
<td>Experiments (x2)</td>
<td>5%</td>
</tr>
<tr>
<td>Project proposal</td>
<td>15%</td>
</tr>
</tbody>
</table>
**Class attendance and participation.** Barring any unforeseen circumstances (e.g., emergencies, strikes, etc.), we will have a total of 29 class meetings. Each meeting is worth 1% of your final grade. 21 of the 29 meetings will be standard lecture-and-discussion, and 8 will be dedicated to skill-building. **Attendance is mandatory.**

During the lecture-and-discussion meetings, we expect you to show up (having done the reading), and be prepared to talk about the connections between the lecture and the reading assigned.

During the skill building meetings, we expect you to show up with your laptop (with R and R Studio already downloaded), and be prepared to follow along.

**IMPORTANT:** If you do not have access to a laptop, **email me** as soon as possible so that we can arrange something.

If you have to miss a class meeting, be sure to notify me via email a week in advance. Early notifications are welcome.

**Section attendance and participation.** Barring any unforeseen circumstances (e.g., emergencies, strikes, etc.), we will have a total of 10 section meetings. Each section meeting is worth 1% of your final grade. We expect you to show up and be prepared to engage with section materials.

**Reading responses (RR).** To promote your proactive engagement with the material in class, you will hand in 20 brief reading responses. These RRs are worth 20% of your final grade. We will **NOT** accept late submissions. **You need to turn in at least 16 of the 20 RRs to be eligible to pass the class.**

A reading response consists of a short summary of the main points of the reading (one paragraph, no more!) and three questions or comments that you have about it. The reading response should be no more than one page. Half a page should be sufficient.

Reading responses are due at 3:59 PM in which the reading is discussed, as indicated in the Course Program (**see below**).
**Homework assignments (HW).** There will be 5 homework assignments throughout the quarter. These HWs will emphasize synthesizing the skills in the skill-building meetings with the concepts discussed in the lecture-and-discussion meetings. **You need to turn in at least 4 of the 5 HWs to be eligible to pass the class.**

**Experiments.** You will be required to participate in two experiments that graduate students and faculty members in the Linguistics Department are conducting. The first experiment will have to be completed on or before the end of week 6 (11/8/2019). The second experiment will have to be completed on or before the due date of the final (12/12/2019).

To sign-up for experiments, go to this website: [https://ucsc-ling.sona-systems.com/](https://ucsc-ling.sona-systems.com/)

Things to do after you’ve taken an experiment:
1. Make sure that you allocate the experimental credit to Linguistics 154 in SONA. If you do not know how to do this, contact me or Jake. We will be more than happy to assist you.
2. Make sure that you have the name(s) of the researcher(s) and the title of the project. You will need this information for what you have to do after.
3. Fill-out the Google form under “Experimental requirement.” This will help us cross-reference your participation when the Department gives us a copy of who participated at the end of the quarter

**You need to participate in 2 experiments to be eligible to pass the class.**

**Project proposal and final paper.** Your final paper gives you a chance to examine in a bit more depth some of the ideas and questions we will be working on in class. This paper will be 8–10 pages long, single-spaced. More specific guidelines are available online.

There will be a proposal in which you describe what your topic is, why it is interesting/important, what you will be reading, and your hypothesis/research question. At the end of the quarter you will write up your research as a final paper.

I expect you to know how to cite thoroughly and completely everything you borrow from other writers. If your paper has citation problems (read: plagiarized content) your grade will be affected and I am obligated to report academic misconduct to the
The official UCSC policy governing Academic Integrity is available at http://www.ucsc.edu/academics/academic_integrity/.

If you need help with basic writing skills visit this website http://www2.ucsc.edu/lss, where they can help you get a tutor.

**Make up policy.** I will NOT accept late written homework assignments. No incompletes for the course will be given except in the direst of circumstances.

**E-mail policy.** Expect a same-day response if you send an email BEFORE 7:00 PM. Expect a next-day response if you send it AFTER 7:00 PM. Why? We’re students, too.

The subject line needs to start with “[Ling 154]” plus whatever it is that you need to talk about. For example, if you are emailing about HW clarification, write “[Ling 154] HW clarification.” Emails without a subject line will NOT be read.

No need to be formal in your email. You can write to us as casually as you’d like. I can’t emphasize enough that casual does **NOT** mean sloppy. Please proof-read and write in complete sentences.

**FORMATTING AND STYLE GUIDELINES**

**Unless otherwise specified,** assume these formatting guidelines:

1. 1-inch margins all around
2. Single-space
3. Standard Serif fonts (Times New Roman, Minion Pro, Droid Serif, or Palatino), size 12
4. Citations need to adhere to APA style
